DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raybuck (#3,188,084). Raybuck shows a seizing device that comprises a first and second cylinder with a knife assembly 4 on cylinder 2 with a paper conducting cylinder 1 with a knife box. Raybuck also discloses that both cylinders 1 and 2 will be provided with impaling pins (col 3 lines 1+). Raybuck discloses that using spring means at 42 biases the gripping means. Raybuck also discloses that the impaling pins and sets of gripper fingers may be affected automatically (col 3 lines 30+). This teaches the basic concept of using gripper fingers and cutters. Raybuck does not show the particular location of elements as claimed but little patentable weight is given to the location of parts, such as where the seizing element is located, unless there is some criticality or unexpected result from the particular location. See in re Japikse, 86 USPQ 70 (CCPA 1950). The surface as claimed is read in a broad context.

Regarding the configuration of the seizing element, little patentable weight is given to the configuration unless there is some criticality or unexpected result from the particular configuration. See in re Dailey, 149 USPQ 47 (CCPA 1976).

Regarding the friction reducing coating as claimed, the examiner notes that it is well known in the art to use friction reducing coating to reduce drag with contacting surfaces.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eugene Kim whose telephone number is (703)308-1886. The examiner can normally be reached on Tuesday-Friday 7:30 a.m - 6:00 p.m.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)308-1148.

Eugene Kim
